OKAY Industries Vendor Policy

Rev. 4

04/08/2021

OKAY Industries has put the following policies in place should an essential vendor or technician coming from a highly infected state, need to visit the buildings to perform critical work.

1. All critical vendors/visitors coming from states or countries that have a positivity rate greater than 5% will be required to provide a negative COVID test result no more than 72 hours prior to coming onsite to OKAY Industries. If no test is provided, access to either building will be denied. A list of states under 5% positivity can be found at the following website: <https://coronavirus.jhu.edu/testing/testing-positivity> and OKAY COVID-19 Information boards.
2. While onsite, access to the building will be limited to the specific area that visitor needs to perform work in. All contact with OKAY employees will be limited or restricted depending on the nature of the visit.
3. Once the visit is completed, maintenance will be notified to perform a deep clean in the areas where the visitor worked, prior to any OKAY employee working in that area.
4. A follow up with the visitor will take place 5 days after the visit to OKAY facilities to ensure that person is not experiencing any signs and symptoms of COVID.
5. If a visitor coming from a state has been fully vaccinated for more than 2 weeks, they can provide their original vaccination card upon entrance to the facility in order to bypass the testing requirements.
